Monologue

Dr. Wallach starts the show discussing his research from the 1970s on cystic fibrosis. Where was able to cause cystic fibrosis in monkeys and when his finding were presented he was fired. He also discussed his research on MD (muscular dystrophy) and when he gave the research to Jerry Lewis it caused him to be fired as well.

П

Pearls of Wisdom

Doug Winfrey and Dr. Wallach discuss a news article on a women who died from lung cancer after getting a lung transplant. After the fact her family found out the lungs came from a heavy smoker. Doc asserts that he could have helped the woman with his knowledge about cystic fibrosis.
